

Product-minded AI engineer with 5+ years of experience turning messy problems into production systems. I work directly with stakeholders to find what should be automated, then design, build and ship the solution end to end. I enjoy exploring new technologies and applying them across enterprise AI platforms, open-source AI tools, and 3D projects.

Experience

AI Software Engineer – Accenture <i>Embedded engineering roles across Medtronic, Merz Pharma and Rabobank.</i>	October 2021 – Present <i>Amsterdam, Netherlands</i>
Forward Deployed AI Engineer – Merz Pharma - Own end-to-end delivery of a production multi-agent orchestrator platform, working directly with the client to identify automation opportunities, design solutions and ship them into production. - Architected and implemented LLM integrations, RAG, streaming chat, tool calling, Google's Agent2Agent protocol, Microsoft Copilot agents, and enterprise system integrations.	
AI Platform Engineer – Medtronic - Built an internal enterprise AI platform used daily across an organization of 50,000+ employees. - Scaled RAG retrieval across large volumes of vector data, moving from exact search to HNSW indexing for lower latency while maintaining acceptable recall. - Implemented chat session management, custom load balancing and a queueing system for LLM providers across regions, alongside enterprise agents, workflows, integrations, evaluation and guardrails.	
Software Engineer – Rabobank - Modernized a 20+ year identity and account platform using Kotlin, Spring, Angular, Azure SQL, and Cosmos DB. - Built business-critical backend services handling 1,000+ QPS with 99.99% availability and single-digit millisecond API latency.	
Full Stack Software Engineer NexoTech	April 2018 – Dec. 2019 <i>Mataró, Barcelona (Spain)</i>
Built a full-stack people-counting web app (React, Java Spring, IoT) and personally handled on-site hardware installation. Also built a computer vision classification model (PyTorch, AWS Rekognition) for demographic attribute detection, as a university intern progressing to full-time.	

M.Sc. in Computer Science Trinity College Dublin	Sep. 2020 – Oct. 2021 <i>Dublin, Ireland</i>
Specialized in AR/VR, Machine Learning, and Computer Graphics.	
B.Sc. in Computer Engineering and Information Systems Universitat Pompeu Fabra	Sep. 2016 – Dec. 2019 <i>Barcelona, Spain</i>
Studied a semester abroad at Ajou University in <i>Suwon, South Korea</i>.	

Personal Projects

Highlighted projects are listed below; open-source contributions (including **React Native**) are available at: github.com/janjs.

- Heighliner**: Built a platform that maps company or personal workflows and converts identified opportunities into LLM-powered automation routes. Link: [heighliner.app](#).
- Stroop**: AI-assisted Strudel live-coding playground for generating and experimenting with generative audio snippets. Next.js, TypeScript, Strudel, Convex. Live demo: [stroop.janjs.dev](#).

Skills

Languages	TypeScript · Python · Java · Kotlin
Frontend & Backend	Next.js · React · Node.js · Spring · React Native · Flask
AI & Data	LLMs · RAG · MCP · Azure OpenAI · AWS Bedrock · PyTorch
Cloud & Infrastructure	Azure · Docker · Cosmos DB · PostgreSQL · Azure DevOps
Other	Enterprise Integrations · 3D Processing · AR/VR · AI Agentic Platforms
Spoken Languages	English (Professional) · Spanish (Native) · Catalan (Native) · Dutch (Beginner)
