

Experience

Software Engineer, AI Platforms Accenture	October 2021 – Present <i>Amsterdam, Netherlands</i>
Promoted twice while growing into AI-focused engineering roles spanning enterprise GenAI platforms, distributed systems, and internal developer tooling.	
• Merz Pharma: Building enterprise AI agents with Next.js, TypeScript, and Python, spanning LLM integrations, RAG pipelines, streaming chat, tool calling, Google’s Agent2Agent protocol, and internal enterprise tooling integrations. • Medtronic: Built an internal AI platform used daily by 50,000+ employees, integrating Azure OpenAI and AWS Bedrock with enterprise workflows, context-aware agents, and no-code tooling for internal teams. • Rabobank: Helped modernize a 20+ year legacy identity and account platform using Kotlin, Spring, Angular, Azure SQL, and Cosmos DB. Built backend services handling 1,000+ QPS with >99.9% availability and single-digit millisecond API latency.	
Full Stack Software Engineer NexoTech	April 2018 – Dec. 2019 <i>Mataró, Barcelona (Spain)</i>
Joined a Spanish startup as a university intern and progressed into a full-time role, working on integrating AI into production applications before the current hype cycle.	
• Led project about designing and building of a full-stack web application build in ReactJS and Java Spring for counting the amount of people in a building with IoT and Deep Learning implementations. • Implemented a Machine Learning model with Keras and Python that recognizes gender and age. Used AWS Rekognition in production for better speed and accuracy.	

Education

M.Sc. in Computer Science Trinity College Dublin	Sep. 2020 – Oct. 2021 <i>Dublin, Ireland</i>
• Specialized in AR/VR, Machine Learning, and Computer Graphics.	
B.Sc. in Computer Engineering and Information Systems Universitat Pompeu Fabra	Sep. 2016 – Dec. 2019 <i>Barcelona, Spain</i>
• Studied a semester abroad at Ajou University in <i>Suwon, South Korea</i>.	

Projects

Highlighted projects are listed below; open-source contributions (including React Native) are available at: github.com/janjs .	
• Chordwise — AI-powered chord progression generator for musicians, built with Next.js, OpenAI API, and Convex. • Scandrop MCP — MCP server that helps LLMs reason about and interact with 3D spatial environments, built with Python, TypeScript, and 3D processing pipelines.	

Skills

Languages	TypeScript · Python · Java · Kotlin
Frontend & Backend	Next.js · React · Node.js · Spring · React Native · Flask
AI & Data	LLMs · RAG · MCP · Azure OpenAI · AWS Bedrock · PyTorch
Cloud & Infrastructure	Azure · Docker · Cosmos DB · PostgreSQL · Azure DevOps
Other	Enterprise Integrations · 3D Processing · AR/VR · AI Agentic Platforms
Spoken Languages	English (C1, Cambridge Advanced) · Spanish (Native) · Catalan (Native) · Dutch (Beginner)
