

Software engineer with 5+ years of experience building AI-powered applications from idea to production using TypeScript, Python, and modern cloud technologies. I enjoy exploring new technologies and turning ideas into production systems, from enterprise AI platforms used across large organizations to personal AI and 3D side projects.

Experience

Software Engineer, AI Platforms
Accenture

October 2021 – Present
Amsterdam, Netherlands

Promoted twice while growing into AI-focused engineering roles spanning enterprise GenAI platforms, distributed systems, and internal developer tooling.

- **Merz Pharma:** Building enterprise AI agents with Next.js, TypeScript, and Python, spanning LLM integrations, RAG pipelines, streaming chat, tool calling, Google’s Agent2Agent protocol, and internal enterprise tooling integrations.
- **Medtronic:** Built an internal AI platform used daily by **50,000+ employees**, integrating Azure OpenAI and AWS Bedrock with enterprise workflows, context-aware agents, and no-code tooling for internal teams.
- **Rabobank:** Helped modernize a 20+ year legacy identity and account platform using Kotlin, Spring, Angular, Azure SQL, and Cosmos DB. Built backend services handling **1,000+ QPS** with **>99.9% availability** and single-digit millisecond API latency.

Full Stack Software Engineer
NexoTech

April 2018 – Dec. 2019
Mataró, Barcelona (Spain)

Built a full-stack people-counting web app (React, Java Spring, IoT) and personally handled on-site hardware installation. Also built a computer vision classification model (Keras, AWS Rekognition) for demographic attribute detection, as a university intern progressing to full-time.

Education

M.Sc. in Computer Science
Trinity College Dublin

Sep. 2020 – Oct. 2021
Dublin, Ireland

- Specialized in **AR/VR**, **Machine Learning**, and **Computer Graphics**.

B.Sc. in Computer Engineering and Information Systems
Universitat Pompeu Fabra

Sep. 2016 – Dec. 2019
Barcelona, Spain

- Studied a semester abroad at **Ajou University** in *Suwon, South Korea*.

Personal Projects

Highlighted projects are listed below; open-source contributions (including **React Native**) are available at: github.com/janjs.

- **Stroop** — AI-assisted Strudel live-coding music playground for generating and experimenting with generative audio snippets, built with Next.js, TypeScript, Strudel, and Convex.
- **Scandrop MCP** — MCP server that helps LLMs reason about and interact with 3D spatial environments, built with Python, TypeScript, and 3D processing pipelines.

Skills

Languages	TypeScript · Python · Java · Kotlin
Frontend & Backend	Next.js · React · Node.js · Spring · React Native · Flask
AI & Data	LLMs · RAG · MCP · Azure OpenAI · AWS Bedrock · PyTorch
Cloud & Infrastructure	Azure · Docker · Cosmos DB · PostgreSQL · Azure DevOps
Other	Enterprise Integrations · 3D Processing · AR/VR · AI Agentic Platforms
Spoken Languages	English (C1, Cambridge Advanced) · Spanish (Native) · Catalan (Native) · Dutch (Beginner)
